## KLIK LEDpod™ XL28FSHR Patented

### DESCRIPTION

Discrete, easy to install marker/orientation light for use in vertical applications such as hollow metal structures, guard rails, posts, and dry wall. The shroud above the LED assists in the control of glare while the optics throw light onto the ground.

### HOUSING

IP65, IK08, clear anodized aluminum body. Color match anodized as an option to color match the material into which the downlight can be installed.

Aluminum housing has a marine grade hard-anodized 25-micron finish, thus preventing galvanic corrosion.

### MOUNTING

Unique concealed internal mounting wings hold the fixture in place, the wings are deployed via patent-pending anti-tamper screws through unobtrusive screw holes in the bezel.

- Minimum internal clearance ~1-3/8", max wall thickness ~1/4"
- Cut Out: Ø~1-1/8"
- Can be customized to suit a thicker wall
